## Model 330 - Grape Pest Alert

Keep tabs on the conditions affecting your crops and the insect and diseases that threaten them with our NEW WeatherTrackers. Placed right in your field, vinyard, or orchard, your WeatherTracker provides instant site-specific data to help you make timely management decisions.

### WeatherTracker systems include:

- Three (3) user-activated degree-day memories and one (1) chill hour memory
- One-button review of 30 days of values and 12 months of summaries
- LCD display (updates every 20 seconds) with easy-to-use keypad
- 9V battery with 8-month life; memory protection in case of power loss
- Easy partial assembly / Installation

Grape growers can avoid costly disease outbreaks with the WeatherTracker 330's Powdery Mildew forecasting functions. Add this to degree-day and chill hour tracking for a comprehensive analysis tool.
