WatchDog 200&400 Series Data Shuttle

A convenient way to read out and relaunch WatchDog 200 & 400 series Loggers and bring the data back to your host PC.

128K memory holds data from up to 13 full 8K loggers, 7 full 16K loggers and 4 full weather stations. Use with Specware Software to launch and offload to your desktop PC. Failsafe, non-volatile EEPROM memory provides added dependability and convenience.
