

DISCONTINUED: Email/Phone Alert Module

Product Images

Short Description

WeatherLink plug in to send email and phone alerts. Requires Vue or VP2 & WeatherLink.

Description

Be alerted whenever conditions approach critical with this optional software module. Ideal for monitoring temperatures to provide frost warning for vineyards and orchards.

This alert is an optional module that can be added to an existing WeatherLink installation. Requires VP2 & WeatherLink.

Additional Information

Promotion	This product has been superseded by the WeatherLink Cloud Platform & Mobile App
Brand	Davis Instruments
Explanation	This module lets you set up specialised e-mail alerts, text messages and phone alerts for any available weather variable. Be alerted whenever conditions approach critical— 24 hours a day, 7 days a week. From the PC connected to your weather station send an e-mail for detailed information on alarm conditions, plus regularly scheduled updates on current weather conditions. These can be sent to anyone with an email account including you mobile phone. (Because systems vary, the phone alert may not work outside the USA). Ideal for monitoring temperatures to provide frost warning to vineyards and orchards.
Contents	Software CD Please Note: The Alert module requires a telephone modem included in your PC for the Phone Alert to be able to connect. These are low-cost items which can be purchased from PC shops.
