

Davis EZ-Mount Tripod

Product Images

Short Description

Sturdy galvanized steel tripod assembly for mounting sensors.

Description

Made of rugged galvanised steel. The ideal solution for a speedy and efficient installation of your Vantage Pro2 or Vantage Vue weather station; whether mounting on flat or uneven surfaces.

Additional Information

Brand	Davis Instruments
Explanation	Made of galvanised steel the tripod consists of 0.92m poles that may be used separately or together to make a single 1.77m pole. Brackets at the base of each leg tilt to mount on your roof or uneven terrain. The maximum height is c.2.4 metres.
Contents	Tripod Two 0.92m (3') poles for use separately or together Mounting hardware (For a full list of included items; click on Resources tab and see the Installation Manual).
Installation	A typical use, on say a flat roof, is to bolt each foot to a paving slab and sit it firmly on the roof. This provides a stable base without damaging the roof.
