

Davis Daytime Fan Aspirated Radiation Shield Kit

Product Images

Short Description

Add the benefits of fan aspiration to your Vantage Pro2 or Pro2 Plus.

Description

Add the benefits of fan aspiration to your wireless or cabled Davis Vantage Pro2 or Pro2 Plus weather station. Less expensive than a 24-hour fan aspirated radiation shield but nearly 75% as effective in reducing the effects of daytime radiation.

Additional Information

Brand	Davis Instruments
Explanation	The fan is solar-powered without batteries so only runs when the sun is out during the day which of course is when a FARS shield is most effective. This unit is compatible with Vantage Pro2 only and will not fit other Davis systems
Contents	Includes fan, solar panel, additional radiation shield plates, and fixings.
