

RainWise IP-100 Network Interface

Product Images

Short Description

The IP-100 facilitates unprecedented transmission and access to real time weather data through multiple formats.

Description

The IP-100 facilitates unprecedented transmission and access to real time weather data through multiple

formats.

Whether connecting online through your computer to our data hosting portal, RainwiseNet, to the RainWise iPhone & iPad app, or by instantly uploading your data to the Weather Underground network, wunderground.com, the IP-100 makes your weather data available to you any time, any where!

****RainwiseNet™ Basic Package Software and Web Hosting is Included Free with the Purchase of the IP-100 Network Interface. RainwiseNet™ Pro Version available for a low monthly fee. Access colour graphs, alarms and alerts, and custom download options.**

Please be sure to select the model that matches your weather station.

Long range versions support LR weather stations only.
