# Davis Wireless Weather Envoy

## Product Images

---

## Short Description

---

An alternative connection to a PC, freeing up your Wireless Vantage Pro2 / Vue Console for use elsewhere.

## Description

---

A "dumb" receiver (no display or buttons) for wireless Vantage Pro2 or Vantage Vue; designed to be fitted with a WeatherLink data logger to connect to your PC.

## Additional Information

Country of Manufacture	United States
Brand	Davis Instruments
Explanation	<p>If you want to have your Vantage Pro2 or Vantage Vue console in a location far from your computer, but you also want to have data flowing to the computer via WeatherLink, add a Weather Envoy to your system. Plug your WeatherLink data logger into the Envoy and your computer or router. The Envoy will receive transmissions from your integrated sensor suite, or from your console, and transfer it to the computer or WeatherLink.com. Now you can have your console by your bed, or in the kitchen, wherever you access it most, without having to take it back to the computer to download data.</p> <p>Weather Envoy allows you to skip the console altogether and view your data on your computer with WeatherLink.</p> <p>Install Envoy with a Solar Power Kit in a remote field installation. Manually download data periodically to your laptop.</p> <p>Envoy includes inside temperature measurement and barometer.</p> <p>If you are installing your Envoy outside in a shelter, you can add an external temperature probe to replace the "inside" temperature reading.</p> <p>Weather Envoy can "listen" to any transmitting station, including a retransmitting console, up to 1000 feet (300 metres).</p>
Contents	Envoy, 3 x AA batteries, 230V UK power adapter, screws for wall mounting.
Ideal For	Professional, Education, Amateur, Gardeners, Agronomy
Installation	The Envoy measures 165 x 90 x 35 mm, so sits neatly on your desk or hangs on the wall.
Measurements	Barometric Pressure, Temperature

## Additional Options
