## Description

---

An integrated, corrosion-proof sensor suite combines a rain collector, temperature and humidity sensors, and anemometer into one package for rugged reliability and performance.

The innovative integrated sensor suite combines a rain collector, temperature and humidity sensors, and anemometer into one package—making setup easier than ever and improving performance and reliability.

For improved accuracy, temperature and humidity sensors are housed inside a radiation shield. The shield protects against solar radiation and other sources of radiated and reflected heat. The anemometer comes with 40 feet of cable so it can be elevated for optimal performance.

(You'll get barometric readings from the Vantage Connect or Weather Envoy.)
