

# Davis Complete Wireless Soil Moisture/Temperature Station

## Product Images

## Short Description

Soil Moisture / Temperature and Leaf Wetness Station for Davis VP2 Stations. Sensors Included.

Ideal for growers; this solar-powered, weather-resistant module senses soil moisture and soil temperature at different depths or nearby pieces of ground, and can be added to with up to 2 leaf wetness sensors.

Four soil/air/water temperature and four soil moisture sensors are included. See the [6345OV](#) for individual items.

## Description

---

### View data online, on your PC, or on a console

The station will send data to WeatherLink Live or any wireless Vantage receiver, such as Vantage Connect, Weather Envoy or a console.

To upload your data to WeatherLink.com:

- - Add WeatherLink Live, or;
- - Add Wireless Vantage Connect

To upload to your PC:

- - Add WeatherLink (serial or USB) data logger to a wireless Vantage Pro2 console or Weather Envoy

To view the data on a console without uploading to your PC:

- - Add a wireless Vantage Pro2 console.

Vantage Pro2 stations will support a single fully-populated station (4 temperature, 4 soil moisture, 2 leaf wetness) OR 2 partially-populated stations (1 with 2 leaf wetness and 2 temperature probes; the other with 4 soil moisture and 4 temperature).

Add up to 2 [leaf wetness sensors](#) to create a custom station.

## Additional Information

---

Brand	Davis Instruments
Contents	Transmitter, weather-resistant shelter, 4 soil moisture sensors and 4 temperature probes.
Ideal For	Professional, Interested, Gardeners
